PROVINCIAL ELECTIONS MONDAY, JULY 18

Edmonton, June 23.—Writs were issued today calling for a provincial election in Alberta to be held on Monday, July 18th, with nominations one week earlier, on Monday, July 11. This announcement was made by Premier Stewart last night after full consultation with the other members of the executive council. The official manifesto to the electors of the province was also given out by the premier at a press conference, outlining the basis for the holding of an election and the policies upon which the government appeals to the province for support.

FARMERS HAVE CONFERENCE WITH EDUCATION DEPARTMENT

Important Discussion on Educational Affairs—Resolutions of Approval Are Passed

The joint educational committee of the U. F. A. and the U. F. W. A. held its first official conference with the Minister of Education and the Director of the Department in Edmonton on June 16th. A very full and satisfactory discussion took place regarding all phases of rural school problems. The efforts of the Department to provide High School opportunity for rural children were strongly approved as was also the general attitude of the Department in defending the autonomous rights of school boards. The members of the committee made specific demands for the support of any plan that would equalize the educational burden throughout the Province.

After the conference the members of the joint committee met in the Coronation hotel and passed the following resolutions which were forwarded to the Minister of Education.

They are in favor of the authorized form of teachers' contract with 5 regarding termination of agreement, making this clause binding upon the employer in the event of either party breaking the contract a minimum penalty equal to one month's salary.

That they favor the principal of the consolidation of centers.

That they are glad to note that the number of official trustees has been materially reduced.

That we are in favor of a system of Provincial taxation for educational purposes.

The report was signed by P. Baker Ponoka, Chairman; Mrs. S. M. Gunn, Paradise Valley; Secretary Stephen Lunn, Pincher Creek, Henry E. Spencer, Edger-

ton; Griffith's superb screen creation "Broken Blossoms," to be shown July 1-2.

Edmonton, June 23.—The motion picture has been accorded a reception comparable to the triumph that has followed every showing of this production. Newspapers have devoted column after column to its beauties and wonders. The picture's success has been instantaneous and it is safe to say that in bringing "Broken Blossoms" to our town the management of the Rex has done its credit to the picture's accomplishment in artistic entertainment that we have yet enjoyed.

Mr. Griffith, it will be remembered, together with Mary Pickford, Charlie Chaplin and Douglas Fairbanks, early in 1919 organized United Artists Corporation, largely to produce "The Big Four" for the making and marketing of their own productions. It is through this organization that "Broken Blossoms" is being presented in the theaters of the country.

The story of "Broken Blossoms" Mr. Griffith adapted from a tale by Thomas Burke called "The Chink and the Child" which is part of the author's book of volumes, "Limericks, Nights." Around this story, and we speak from the opinions of dramatic critics the country over, Mr. Griffith has built the most alluring, most beautiful, most tragic love story ever filmed. It has become the habit, almost, to look upon a Griffith production as something more than a picture, yet even the most ardent admirers of the art of this master of the films did not dream of the wonders that he would reveal in "Broken Blossoms."

CALGARY EXHIBITION

In the program which will be presented at the 1921 Exhibition to be held June 30 to July 8, the management considers it has the highest class and most entertaining features that have ever been secured for the Calgary Exhibition.

An attraction which will undoubtedly be the most popular for many years is the massed festival choir of 200 voices, composed of the best Calgary choirs which will compete in the recent Alberta Musical Festival.

The choral work at this festival was so good that one of the judges, Dr. D. C. H. Hall, Professor of choral singing, Columbia University, New York, said "the choral work at this Festival has reached the highest mark I have ever heard in choral work on this continent."

A forty-five minute concert will be given each evening by the massed choir, accompanied by a thirty piece orchestra, which will include violins and other special performers in addition to the choral numbers.

Another feature which will delight all exhibition patrons, during the evenings, will be the firework display. A remarkable display of aerial fireworks will be given in addition to a reproduction of the Naval Battle at Dover. This will be given in the evening following the regular platform program, which in itself will constitute a wonderful evening's entertainment.

The five stock and industrial exhibits this year promise to be equal to anything ever seen before. The exhibits are particularly bright for the best exhibition that has ever been held in Calgary.

Union meetings between the Presbyterian and Methodist churches have been arranged for the months of July and August.

McKinney's Summer Specials

Men's Suits \$14.95, in blue, brown and green. Young men's models, good fitting and well finished. Very special value.

Western Premiers' Conference To Discuss Unoccupied Land Problem

The announcement has been made in the Manitoba Legislature that Premier T. C. Norris will call a conference of the prairie provinces to consider what kind of uniform legislation is necessary to deal with the unoccupied land problem in Western Canada. It is the opinion of the conference that the provinces now have the land with a view of finding ways and means to increase their productivity to the country.

It need not be argued that the calling of a conference for such a purpose is timely and in the national interest, for it has been well said that the economic future of the West and of Canada as a whole, depends upon the proper settlement of the unoccupied lands along existing railway lines and upon the improvement of conditions affecting the production of basic farm products.

The forthcoming conference is the outcome of various meetings held between the Western Provincial Cabinets and the officials of the Western Canada Colonization Association.

In the memorial recently presented to the Western Governments by the Manitoba Association of Unoccupied Lands, it was urged that a bill be introduced that uniform legislation, calling for the listing of unoccupied lands at fair prices and for a reasonable period, was the key to the success of any genuine colonization movement.

It is idle to advance the theory that voluntary listing of unoccupied lands will suffice, for those who are in a position to judge of the possible success of such a movement are personally impressed with the statement of General MacRae that the proposed legislation is both reasonable and necessary, if the money subscribed to the Western Canada Colonization Association is to be expended in the national interest.

The listing of unoccupied lands with the provincial governments will enable their Land Boards to issue maps and price lists similar to those now issued by the railway companies, so that the public may know at any time of the week and not only serve the purpose of the Western Canada Colonization Association, but as well all the land agencies throughout the provinces. In addition the necessary information will be provided to enable the Dominion Government to direct immigrants to the vacant lands near existing railway lines where homesteads are no longer available.

It is the opinion of the conference throughout the country to the proposal for provincial legislation is evidence that the people of the West are seriously anxious to effectually deal with, and find a solution for, the unoccupied land problem in the prairie provinces.

The proposed "inter-provincial Premiers' conference" will probably be held at an early date, the outcome of which will determine the course of action to be taken by the West. In the meantime every board of Trade, Municipal Council, Farmers' Organization, and all interested public bodies and citizens, should give serious consideration to this important subject and make representations in regard thereto to their respective Governments. Some legislation undoubtedly is necessary to deal with the serious unoccupied land problem. Needless to say, every urban resident affected by the success or failure of this fair price land and should immediately, while still in the prairie provinces, attend the forthcoming Premiers' conference when agricultural conditions will be fully reviewed and an honest attempt made to find a remedy for existing ills.

Germany Lost Her Opportunity

Refused Chance to Make Voluntary Offer to Allies.

The British premier lays open the very core of the problem when he notes the change of attitude of Germany's government during the first days of their terror when they came as suppliants to Foch on November 11, 1918. Today Berlin is making excuse not merely for delay, but for avoidance of their debt. "She is here to demand payment of her liability," he says, and when their representatives "refuse to face their obligations they are shamed, and encouraged and supported."

Germany had an opportunity to make a voluntary offer, but she refused to take advantage of the offer. When forced to take action, the proposals she made were in the words of the British premier "exasperating." Today she faces a demand to be made by the allies of Britain and the bayonets of France. If the terms are harsh Germany has only herself to blame.—The Montreal Star.

African Blacks on Rampage

Claim to Belong to Lost Tribes of Israel.

A despatch received from Johannesburg, South Africa, says a strong force of police, armed with machine guns, is concentrating in the Queenstown district, where a large number of blacks, claiming to belong to one of the lost tribes of Israel, have seized large numbers and committed a series of crimes against the European populace.

These blacks, the despatch asserted, declare they are waiting for a divine call to return to Palestine and that they are engaged in preparation for this.

A Good Load of Hogs.

Hog raising in Western Canada is still a paying proposition despite the slump in prices of all farm products. John Hartman, of Coopersburg, Alberta, recently delivered a load of his Lettishberg hounds, averaging 270 pounds each. They were nine months old and scaled this weight after a journey of eighteen miles.

Discoverer of Radium Is Remarkable Woman

Madame Curie's Position In Scientific World Is Without Parallel In History.

Mme. Marie Curie, discoverer of radium, is in New York to receive the gift of one gram of this very valuable element from American women. The rise of this woman to the position of leader in science in the world is without parallel in history. The daughter of a poor but distinguished Polish scientist, she worked her way up in the field of her choice until today she became the first woman to receive the Nobel Prize award, being the first and only woman professor at the Sorbonne in Paris of having received the ribbon of the Legion of Honour. As she put it, "I did not deserve the award, but I did deserve the English Albert Medal from the Royal Society of Arts, the second, to be granted to a woman, Queen Victoria having received the first. There were many more hours and decorations received, but the response in most all instances was similar to the one given to the suggestion of the Royal Society of Arts.

A STUDY OF OLD AGE

Is always interesting and reveals the fact that the blood is usually thin and lacking in the strengthening properties of youth. The best way to fill up to fill your blood with the fire of youth, build up your strength, restore your nerves, never fail Dr. Hamilton's Pill. This is a great medicine is a grand system regulator. Keeps the body free of wrinkles and decorations. For young and old the use of Dr. Hamilton's Pill is recommended. All in all death or The Cataractone Co. Montreal.

Tuesday Is Calm Day.

Statistics show that fatalities are far greater on Monday than on Tuesday or any other day of the week. Rail-road disasters, fires, street accidents—these in each case is easily caused by Tuesday.

Cataractone

Causes a body directly influenced by constitutional conditions. HALE'S CATARRHATE MEDICINE is a tonic and restorative. It is a great medicine in building up the System. HALE'S CATARRHATE MEDICINE is a great medicine. It keeps Nature to do its work.

Dr. J. C. Chene & Co., Toledo, Ohio.

Telephone Subscribers Increase.

The new issue of the Manitoba Government telephone directory for Winnipeg shows an increase of 600 subscribers, there being 40,000 names in the latest, while in the January issue there were 39,400 listed.

WELL SATISFIED WITH BABY'S OWN TABLETS

Once a mother has used Baby's Own Tablets for her little ones she will use nothing else. Her use of them leads her to believe there is nothing else to equal them.

The many thousands of children of all ages throughout the world are satisfied with the Tablets that I lose no opportunity in recommending to parents to make their babies as healthy as possible.

These tablets are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brooklyn, Ont.

Allies Will Care For German Graves

Over 400,000 Estimated to be on French Soil.

A conference will shortly be held between the representatives of the British, French and American Armistice Commissions and German representatives, with regard to the treatment of German graves in Allied countries and of Allied graves in Germany. It is estimated that there are well over 400,000 graves in France on French soil and over 30,000 French graves in Germany. It is hoped that a satisfactory solution of this problem may be reached at the conference.

Farms In New York City.

There are in the limits of the city of New York 800 farms, valued at more than \$35,000,000. Five are in Manhattan, 55 in the Bronx, 54 in Brooklyn, 563 in Queens and 121 in the Borough of Richmond. There are farms in a farm in the nation's greatest city varies according to location, and the average acreage value runs all the way from \$500 in the Bronx to nearly \$3,000 in Brooklyn.—New York Times.

Minardi Liniment used by Physicians

Why Not Use Dried Fruit?

BY LORETTA C. LYNCH

An Acknowledged Expert in All Matters Pertaining to Household Management.

Some folks have the idea that in order to be effective, fruit must be both ripe and juicy. They pass by delicious dried fruits plentiful and cheap enough to delight the heart of the most frugal housewife.

All dried fruits, as well as all Oriental fruits like figs, dates and figs, are horrifying dirty. Under the microscope this dirt is highly visible. Therefore, dried fruits must be thoroughly cleaned with a small brush while washing. I find a new toothbrush desirable.

Then put the fruit to soak in clean cold water in a covered vessel. The fruit may be steamed in this water for a few minutes. Let the water cool, then add a few drops of oil to the water.

Then add a few drops of oil to the water.

It is the opinion of a "dried and soaked" fruit arrangement to cook slowly. This will aid in developing the natural flavor and sweetness. If you must add extra sugar, add it toward the end of the cooking. Less sugar is needed to give the desired sweetening if added at the end of the cooking.

A combination of prunes steamed with raisins and very little lemon juice is a good change. A delicious compote dessert may be made of prunes combined with lemon gelatin. A pint of lemon gelatin is prepared and allowed to cool, but not necessarily hardened. It is then whipped to a pulp and added to the prunes.

It is then whipped to a pulp and added to the prunes.

The mixture is set aside to thoroughly chill, or it may be first packed into molds. It is served with additional whipped cream. This makes twelve servings.

A novel frozen dessert is made by freezing a custard pulp, obtained by forcing steamed apricots through a strainer, and a cupful of banana pulp to a quart of very sweet lemonade, and then freezing. The tongue must be over-sweet, as the tongue does not recognize the sweetness of frozen fruits so readily as others.

These fruits are for sale in the market.

Old Fort Ellis and Sioux IndiansCrossing the Plains to Fort Carlton
Summer 1875.

By OGE-MAS-ES (Little Chub).

(Copyrighted)

(Continued)

The mountaineer left early and shortly after my arrival five boat loads arrived from the furthest north post in the district, Le Brochet, situated at the northern end of that lake and semi-arctic in climate. About half the boat crews were Chipewyan Indians, and my first meeting with this tribe and their great contrast in appearance to that of the plain Indians could not be found. They were rather short, more Asiatic in looks, many of them blind-eyed, and they were not a pleasant looking lot, but were a hardy, bold and industrious people. Brochet was a famous fur post, and as many of these men were noted hunters, they nearly all had considerable credits with the traders, goods being sent short at their home post.

These balances ran from fifty skins to two and three hundred a man, and fortunately for us Mr. Pierre Deschambault accompanied the brigade, he having succeeded his father in the charge of that post, and moreover, speaking Chipewyan like a native. 1 and a young apprentice clerk named Jack Stewart, were detailed to the trading store and here we passed many a quiet evening with the Indians who appeared to be very inferior to the Crees in intelligence.

Two or three were taken into the store at one time, Mr. Deschambault being present, then goosequills were sent out, and the Indians were paid off with the number of skins to their credit. At first we tried to hurry the procedure, but soon found that the more haste the less speed with these primitive men, as once get them concerned and they are bound to continue at the beginning and end of all over the performance. The old depot as it was called in which the trading store was situated, was over a hundred years old, built of massive square timbers, and had been raised on piles in the Saskatchewan River. Down on the floor squatted each Chipewyan, and spread out before them were the quills, and as he kept sorting them out, varying little in width, would exclaim in genuine Indian words, "What the language they speak was very different from any of the other native languages I had heard, and sounded as if it was uttered from the back of the throat. Mr. Deschambault would answer him, "That's the language we use, and though geologists have reported valuable mineral veins it is even at this late date, unexplored, like the great north country."

For Deschambault had given us to go east for a winter on a visit to his people. The Pape was made headquarters for the district, and a Mr. Alex. Matheson (chief clerk) a very talented Scotswoman, who was placed in charge of the Indians, and was to be rated as an assistant. All the distances, distances covering a country extending from Grand Rapids at the mouth of the Saskatchewan River to a point midway between Brochet and the Hudson Bay, were covered in a day.

At last, after a long and laborious trip with, also much stuff to pack for various posts, as boats had to leave at a certain time to get to their destination before freeze-up.

Madame Blanger, who was lady of much refinement, very kind to us, and constantly entertained us. She had a beautiful garden in which cultivated roses formed a prominent feature, and these were quite equal to anything you would find in Eastern Canada. Mr. Deschambault, who had accompanied his wife, had been made headquarters, was a gay young creature, and only too delighted to get away from the lone desolation of Le Brochet to the comparative civilization of Cumberland House where dances were held several times weekly.

Pierre himself detected as follows:

civilization, and counted the days until he could return to his beloved north country. He was known to be possessed of a considerable private income (which took good care of) and an indent sent down some time ago, had been signed and sealed, there was included with his private order one very indispensable article of China, that is generally kept under the bed. Some way changed this in one dozen and again at the end of the month the Legislator, or the enlarged powers of the new House Bill measures it might be called.

The general temper was sullen. The great Princess surrounded the Duke in all her splendor, and when the great chief was entertained with diamonds. The ransom of kings stood upon the breasts of the native aristocracy, with a blinding light; but Mr. Ghandi, the arch-conspirator, and those who concurred with him, and the Duke, were to visit the city of Fort Carlton and erecting a stadium.

**Oriental Language
Quickly Learned**

Study Does Not Offer Serious Difficulties to Englishmen.

The word has gone round in commercial circles that Chinese and Japanese are the languages for young men and women to learn. Dean Inge (known as the "wise" Dean of St. Paul's Cathedral), speaking at a City of London College, laid stress on the importance of the study by Englishmen Chinese and Japanese for commercial purposes, and regretted the lack of facilities for such study in London. Sir E. D. Denyer, Rector, Director of the School of Oriental Studies, indicates that the languages do not offer such serious difficulties as might be imagined.

**Mennonites Pay
Million To Railways**Going From Western Canada to
Land of Religious Freedom

Definite arrangements for the southward trek of the Mennonites to Mexico have been made and more than \$1,000,000 in railway fares will be paid the railroads.

Between 15,000 and 20,000 Mennonites will take part in the exodus from Western Canada to what they say will be a land of religious freedom. This business, which is the greatest religious massed movement since the flight of the Mormons from Illinois to Utah.

**Patient Swallows Radium
Unaware That \$2,500 Had Gone Down
His Throat.**Radium valued at \$2,500, which my-
self was given from the Sheffield Royal Infirmary, was, it has since been discovered,吞食 by a patient who was being treated for cancer of the tongue. Needless to say, he was quite unaware that the in-

definite patient had gone down his throat.

The electroscope, or special apparatus used in a search for missing radium is a very simple affair. An eminent radium specialist showed one to a press representative the other day. It was used unsuccessfully on the patient to no effect.

The Presented.

A very cultured and accomplished dyslexic the south was once in the company of an illiterate person who professed to be a doctor and who remarked:

"I am thankful that the Lord has opened my mouth to preach without learning."

"A similar event occurred in Bas-
tia's time," was the retort.

Valuable Discoveries in B.C.A large body of strontium sulphate
and strontium carbonate, respectively
and strontium nitrate, has been

found on "Tewes" 200 miles north of Vancouver. It is said to be fairly ex-

istent. Strontium is used in the refining of beet sugar, and it is also thought it may be found suitable to use in white lead in place of barium.

Postponed Western Canadian Tour.

The Island Daily Press Association, Chicago, has abandoned its proposed tour of Western Canada for summer as the guests of the Canadian Government. Although the Canadian Parliament had carried an appropriation for the trip, the invitation was temporarily withdrawn when a reduction in fares of Canadian railroads could not be obtained.

Karakul Sheep Industry.

The success of pioneer breeders in Canada of karakul sheep has resulted in a great demand for them, and the industry has spread rapidly over the Dominion. T. Karstad, of Camrose, Alta., is the latest addition to the list, having secured a foundation stock of twenty head from Dr. Patrick's Ranch.

On an average a spinster's hair turns gray five years sooner than a married woman's.

People who are both faithful and executive are hard to beat.

Conscience is a critic or it is atro-

**U. S. Will Present
Stadium To France****Also Pay Cost of Levelling Shell
Bombed Ground.**

A second study is to be given to France by America when the American Committee for Devastated France presents to the city of Soissons a similar sports grounds to Pershing Stadium presented to Paris by Americans during the war.

During the war the American Red Cross acquired a large plot of ground in which to carry on its work, and soon after the armistice the American Committee, with the endorsement of the U. S. Legation, presented the enlarged powers of the new House Bill measures it might be called.

The general temper was sullen. The great Princess surrounded the Duke in all her splendor, and when the great chief was entertained with diamonds. The ransom of kings stood upon the breasts of the native aristocracy, with a blinding light; but Mr. Ghandi, the arch-conspirator, and those who concurred with him, and the Duke, were to visit the city of Fort Carlton and erecting a stadium.

**Duke of Connaught
Won People in India****Conspirators Tried to Make Trouble
But Were Unsuccessful.**

By all accounts the Duke of Connaught was a most popular chief. That is the unanimous testimony of the British correspondents who accompanied the Duke on his visit, undertaken at the request of the King. The American committee, with the endorsement of the U. S. Legation, presented the enlarged powers of the new House Bill measures it might be called.

The general temper was sullen. The great Princess surrounded the Duke in all her splendor, and when the great chief was entertained with diamonds. The ransom of kings stood upon the breasts of the native aristocracy, with a blinding light; but Mr. Ghandi, the arch-conspirator, and those who concurred with him, and the Duke, were to visit the city of Fort Carlton and erecting a stadium.

The doctrine of self-determination of little nations is waning, and Great Britain is justified in retaining the Irish sovereignty, despite the best claims of Ireland for the world's sympathy and support in a sincere fight, according to Dr. Hawkins, an American writer.

"The doctrine of self-determination," states Dr. Hawkins, "widely proclaimed since the World War, has been fruitful of nothing but strife and turmoil in many parts of the earth. It has drenched Ireland in blood and torn her to pieces, and the doctrine which sounds well when proclaimed by idealists and political dreamers, but, except in rare cases, is a false principle and impossible in practice."

"The doctrine of self-determination," states Dr. Hawkins, "widely proclaimed since the World War, has been fruitful of nothing but strife and turmoil in many parts of the earth. It has drenched Ireland in blood and torn her to pieces, and the doctrine which sounds well when proclaimed by idealists and political dreamers, but, except in rare cases, is a false principle and impossible in practice."

OPERATING
COSTS -

THE economy of using Imperial Polarine Motor Oils extends over practically every item of motor operation.

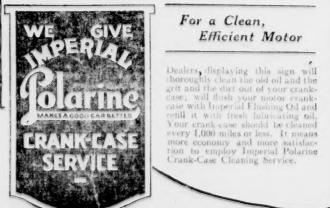

The lubrication afforded at every friction point and the gas-tight piston-to-cylinder seal means a big saving in fuel bills and a noticeable increase of power.

Through perfect protection of all motor parts, undue repair bills are avoided and depreciation is greatly reduced. By using Imperial Polarine Motor Oils you can save dollars this year on maintenance alone. Besides, you realize more profit and greater usefulness from your car.

Always use the grade of Imperial Polarine recommended on our Chart for your type of motor. See Charts at your dealer's or write to 56 Church Street, Toronto, for a copy of our interesting booklet, "Automotive Lubrication," which contains the complete Chart of Recommendations.

BRANCHES IN ALL CITIES

For a Clean,
Efficient MotorDealers displaying this sign will
keep your motor clean, cut down
the heat and the dirt out of your crank-
case; will flush your motor crank-
case, will clean your motor and
refill it with fresh lubricating oil.
Your crank-case should be cleaned
every 1,000 miles. It is much more
economical and more satisfactory
to employ Imperial Polarine
Crank-Case Cleaning Service.

Why

THE CANADIAN
POWER
FARMERis making a special offer to the
publishers of this paper and its
readers. The Publishers of

The Canadian Power Farmer

write to us as follows:

"People have asked us how we can afford to make this exceptional offer to some of the weekly papers. The answer is simple. Behind the offer is that we want to get away from the necessity of employing salesmen to sell our paper and its readers. We have sold to many good subscription solicitors, but we have found that you, the paper's readers, have a real desire for offering fair premiums and other features. We want to give the Canadian farmers to subscribe to periodicals of all kinds that the best class of farmers will have something to do with them.

The Canadian Power Farmer wants only good practical papers on the subject of agriculture. We do not want and will not in the future, employ salesmen to sell our paper to people who live right in the district and who can be trusted. It is to give publicity to the best and most reliable papers in Western Canada to cooperate with us in launching out fair subscription offers. We will be glad to receive the weekly papers in this Special offer."

The E. H. Heath Co. Ltd.

Both Papers, a
Weekly and
a Monthly
for One Year
FOR \$2.00

If you want to take advantage of this
splendid offer write or call on the
